Professional Telephone Headset

If you're looking for the perfect balance between durability and comfort this headset is the one for you. No longer are the two key ingredients in telecommunications headsets mutually exclusive. This headset works exceptionally well as an all round call centre headset. The earpiece fits on the product using a flexible fitting that will move within a large range of angles so it rests comfortably on your ear. Along with a flexible ear piece the headband is full adjustable to all head sizes. This headset can guarantee a comfortable ride throughout the most stressful of call centre days.

The TM710 Professional Monaural Headset incorporates the newest technology when it comes to getting a crystal clear, accurate signal. The microphone encompasses a noise cancelling feature that will prevent the surrounding background noise from being picked up and magnified. This means that even in a busy call centre the user won't need to raise their voice over the necessary level to get a good signal through this device.

There is also a built in acoustic shock protection (ASP) feature that provides a similar facility as the noise reduction except for the headset output. The ASP keeps the output signal at a consistent and suitable level for the human ear. This means that any abrupt and high volume noise will be reduced to the suitable level of normal hearing, protecting the users ear and giving a consistent volume throughout the call.

Professional Telephone Headset

710 Series Key Features

- **Lightweight & Durable Headset.** Weighing about 40 grams (depending on the model), the 710 series is the strongest headset ever-built within the lightweight class.
- **Comfortable Wearing.** Designed for all-day wearing, the headset is extremely comfortable, whether it is with the high-grade leatherette or foam ear cushions.
- **Award-Winning Design.** Minimalistic design with elegant curves and well-built architecture gives the 710 a perfect combination of style and functionality.
- **Professional Acoustic Performance.** Equipped with a proprietary 28mm voice-enhance speaker, and a choice of noise-cancelling aluminium boom or transparent Soundtube, call clarity for the 710 headset is excellent.
- **Perfect Fit and Adjustments.** With an extendable metallic headband, rotatable earpiece and multi-adjustable microphone boom, the 710 fits users of all head sizes and preferences.
- **QD and ASP.** Sound protection against sudden burst of incoming signal is protected by the Acoustic Shock Protection circuitry. Quick disconnecting cable provides convenience as well as flexibility in choosing direct cable connections.
