

# Nursing Kid (SimPad Capable) Brown Skin

## **Nursing Kid (SimPad Capable)**

The clinical skills training manikin for in-hospital pediatric professionals

### **Improve Core Pediatric Skills**

Realistically representing a ten-year old child, Nursing Kid is designed for skill and scenario-based training of the care and management of a variety of pediatric patients. This child is ideal for clinical training of common and uncommon in-hospital pediatric patients including wound assessment and care, first aid, and child abuse training.

## **Educationally Effective Training**

Nursing Kid provides training targeting key skills specific to pediatric care providers. Nursing Kid is designed to meet the training requirements for pediatric patient care and helps facilitate delivery of consistent simulations into nursing curricula.

### **Nursing Kid Features:**

Articulating IV arm allows for practice of IV cannulation, medication administration and site care and maintenance. Venipuncture possible in the antecubital fossa and dorsum of the hand. Accessible veins include median, basilic and cephalic.

Interchangeable male and female genitalia allow for complete urinary catheterization. Enema procedures may also be performed.

Head with anatomical landmarks, trachea, and esophagus along with simulated lungs and stomach allow the practice of many procedures, including NG, OG, tracheal care and suctioning, and insertion, securing and care of endotracheal tubes.

Optional Pediatric Trauma Modules add realism to the training scenario.

### **Making Simulation Easier with the SimPad System**

Nursing Kid operated via the SimPad System will improve your ability to deliver highly effective simulation based training and achieve your learning objectives.

#### **SimPad System features:**

Handheld, intuitive touch screen remote for easy 'pick up and play' experience  
Operate on-the-fly or utilize Scenarios and Themes for consistent simulation training  
Optimal data capture for quality debriefing  
Mobile - teach anywhere  
Optional patient monitor provides clinical realism

Easy-to-use simulation for patient care and clinical skills development

#### **Includes:**

Child Manikin (SimPad capable), Airway Lubricant, Simulated Blood, Hospital Gown, Carry Case, and Directions for Use.
