

Heal Force Real-Time PCR

A platform you can depend on

The X960 Real-Time PCR system is a high-performance benchtop instrument giving you greater control of your experiment data. It delivers reliability, sensitivity, and accuracy, which is optimized to enable the broadest range of quantitative PCR applications.

In real-time quantitative PCR (qPCR), PCR product is measured at each cycle. By monitoring reactions during the exponential amplification phase of the reaction, users can determine the initial quantity of the target with great precision

without involving post-PCR analysis such as gel electrophoresis and image analysis.

Innovative Optical Design

Two channel (X960A) and five channel (X960B) fluorescent detection system with LED light source and high resolution CCD

The optical system automatically collects data from all wells during data acquisition at the same time.

X960 can discriminate up to five targets in a single reaction well.

The optical filter sets are designed to maximize fluorescence detection for specific dyes in specific channels

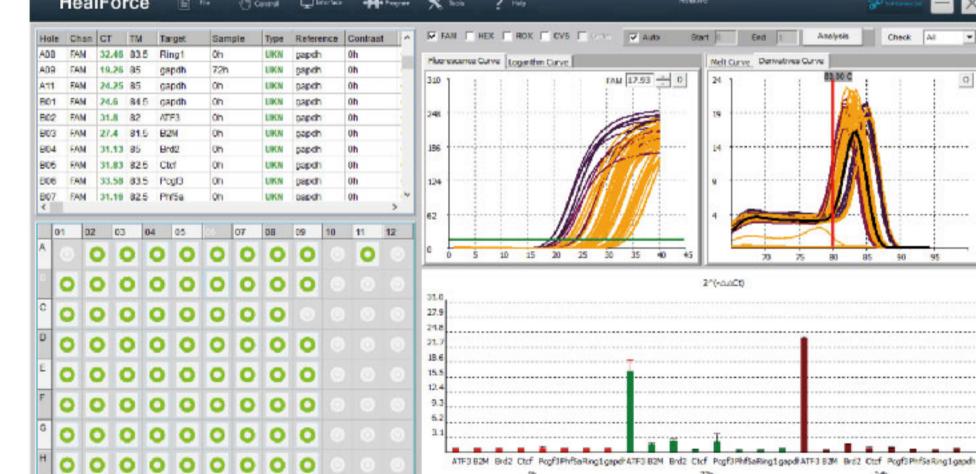

Compatible with different reagent and consumables

Precise Temperature Control

Block utilizes most advanced Peltier-based technology with high amplification efficiency Up to 6 °C/s maximum ramp rate saves your valuable time dramatically Two independent temperature control mode- block and tube, maximize control flexibility

Excellent temperature uniformity limits the variation between wells, ensuring the accuracy of low copy sample

Powerful Software

X960 Manager Software accommodates individual needs with intuitive navigation and customizable settings

The software can be used for a variety of applications including absolute/relative quantification, melting curve (dissociation curve), etc

With integrated powerful visualization tools, the data is analyzed on machine directly

Humanization Design

Advanced programming function like gradient and touch-down
The machine can be connected with PC through WI-FI or LAN
Software allows you to manage and monitor several X960s from your computer.
Low noise, low energy consumption, long life-span

Ready to Run

Factory calibrated for optical and thermal accuracy, the instrument is delivered ready for quick installation and use.

Technical specifications

Model	X960A	X960B
Channel	2	5
Reactions per run	96	96
Block Format	96-well 0.2-ml	96-well 0.2-ml
Color Combinations	Up to 2	Up to 5
Light source	High brightness monochrome LED	High brightness monochrome LED
Detector	Highly sensitive cold light CCD	Highly sensitive cold light CCD
Detection dynamic range	10°-10 ¹⁰	10°-10 ¹⁰
Sensitivity	1 copy	1 copy
Reaction volume	15ul-100ul	15ul-100ul
Chemistry	All real-time PCR-based chemistries. Flexibility	for chemistries without passive reference dye.
