

SUNNYMED
Features:

Lighttype: Near-infrared light
Infraredwavelengths: 850nm
Light radiation: no
Battery: Lithium-ion Battery, 3.6V, 4300mAH
Continuous run time: 4 hours
Battery charge time: 3 hours
Best imaging distance: 20±2cm
Weight: 490g
Dimension: 240x60x60mm (LxWxH)

Operating Mode: Handheld or Suspension

Application department: pediatrics, oncology, radiology, plastic surgery, surgery, laboratory, emergency, outpatient, vascular surgery... Can use for hand, arm, neck, face and leg

Visualization Modes

Color: switchable colors can fit different needs from the nurses.

Inverse: Allows clinicians to highlight the veins or highlight the surrounding tissue, for reducing the interference of complexions, density of hair follicles and room brightness.

Brightness: brightness adjustable, allowing clinicians customizing the image brightness base on the environment light.
