

# Wile 27

Wile 27 measures the moisture content of baled hay, straw and haylage. It's simple and easy-to-use.

Wile 27 ensures accurate readings across a wide range of materials. The meter has moisture settings for different types of bales with variable densities.

- Moisture measurement of hay bales, drying silos and haylage: 10–70% moisture (10–55 % for tightly baled wet haylage)
- Moisture measurement of barley and wheat straw: 10–50% moisture
- Repeatability of the measurement results: 2 %-points

## Features

• High frequency capacitive moisture measurement • User adjustable bale density compensation for improved measurement accuracy • Average calculation • User adjustable moisture offset calibration • LCD display with large digits • Automatic power-off • Low battery warning • Probe length 48 cm

### PRODUCT INFORMATION

|                   |               |
|-------------------|---------------|
| Battery           | 9 V           |
| Warranty          | 1 year        |
| Probe length      | 48 cm         |
| Wile product code | 7030270       |
| EAN code          | 6417160102309 |

### MITATTAVAT MATERIAALIT

| Mitattava materiaali | Kosteuden mittausalue |
|----------------------|-----------------------|
| Heinä ja säilöheinä  | 8–80 %                |
| Olki                 | 8–25 %                |
| Heinäsäilörehu       | 30–84 %               |
| Maissisäilörehu      | 40–76 %               |
| Sinimailanen         | 8–75 %                |
