منابع آمادگے آزمون ارتقاء و بورد تخصصی پزشکی ۱۳۹۶

ردیف	درسنامه پلاس	محتوای درسنامه پلاسهای رشته <u>قلب و عروق</u>
۱	۱	Heart Failure Mechanisms of Cardiac Contraction and Relaxation Pathophysiology of Heart Failure Clinical Assessment of Heart Failure
۲	۲	Diagnosis and Management of Acute Heart Failure Management of Heart Failure Patients with Reduced Ejection Fraction Devices for Monitoring and Managing Heart Failure
۳	۳	Heart Failure with a Preserved Ejection Fraction Surgical Management of Heart Failure Mechanical Circulatory Support Cardiovascular Regeneration and Gene Therapy
۴	۴	Care of Patients with End-Stage Heart Disease Genetics of Cardiac Arrhythmias
۵	۵	Evaluation of the Patient The History and Physical Examination Electrocardiography Exercise Stress Testing
۶	۶	Echocardiography The Chest Radiograph in Cardiovascular Disease Nuclear Cardiology
۷	۷	Cardiovascular Magnetic Resonance Imaging Cardiac Computed Tomography
۸	۸	Cardiac Catheterization Coronary Arteriography and Intracoronary Imaging
۹	۹	ATHEROSCLEROTIC CARDIOVASCULAR DISEASE Coronary Blood Flow and Myocardial Ischemia Approach to the Patient with Chest Pain ST-Segment Elevation Myocardial Infarction : Pathology, Pathophysiology, and Clinical
۱۰	۱۰	ST-Segment Elevation Myocardial Infarction : Management Non-ST Elevation Acute Coronary Syndromes Stable Ischemic Heart Disease
۱۱	۱۱	Percutaneous Coronary Intervention Transcatheter Therapies for Structural Heart Disease in Adults
۱۲	۱۲	Diseases of the Aorta Peripheral Artery Diseases
۱۳	۱۳	Prevention and Management of Ischemic Stroke

Treatment of Noncoronary Obstructive Vascular Disease Diabetes and the Cardiovascular System		
Arrhythmias, Sudden Death, and Syncope Genesis of Cardiac Arrhythmias: Electrophysiologic Considerations Diagnosis of Cardiac Arrhythmias Therapy for Cardiac Arrhythmias	۱۴	۱۴
Pacemakers and Implantable Cardioverter-Defibrillators Specific Arrhythmias : Diagnosis and Treatment	۱۵	۱۵
Atrial Fibrillation : Clinical Features, Mechanisms, and Management Cardiac Arrest and Sudden Cardiac Death Hypotension and Syncope	۱۶	۱۶
Preventive Cardiology The Vascular Biology of Atherosclerosis Risk Markers for Atherothrombotic Disease Systemic Hypertension : Mechanisms and Diagnosis	۱۷	۱۷
Systemic Hypertension : management Lipoprotein Disorders and Cardiovascular Disease Nutrition and Cardiovascular Disease	۱۸	۱۸
Exercise-Based, Comprehensive Cardiac Rehabilitation Integrative Approaches to the Management of Patients with Heart Disease	۱۹	۱۹
Diseases of the Heart, Pericardium, and Pulmonary Vasculature Bed Congenital Heart Disease Valvular Heart Disease	۲۰	۲۰
Cardiovascular Infections The Dilated, Restrictive, and Infiltrative Cardiomyopathies	۲۱	۲۱
Hypertrophic Cardiomyopathy Myocarditis Chemical Cardiomyopathies Cardiovascular Complications of Cancer & Therapeutic Agents Cardiovascular Abnormalities in HIV-Infected Individuals	۲۲	۲۲
Pericardial Diseases Traumatic Heart Disease	۲۳	۲۳
Pulmonary Embolism Pulmonary Hypertension Sleep Apnea and Cardiovascular Disease	۲۴	۲۴
CARDIOVASCULAR DISEASE IN SPECIAL POPULATIONS Cardiovascular Disease in the Elderly Cardiovascular Disease in Women	۲۵	۲۵

منابع آمادگی آزمون ارتقاء و مورد تخصصی پزشکی ۱۳۹۶

Pregnancy and Heart Disease		
Exercise and Sports Cardiology	۲۶	۲۶
Anesthesia and Noncardiac Surgery in Patients with Heart Disease		
CARDIOVASCULAR DISEASE AND DISORDERS OF OTHER ORGANS	۲۷	۲۷
Endocrine Disorders and Cardiovascular Disease		
Hemostasis, Thrombosis, Fibrinolysis, and Cardiovascular Disease		
Rheumatic Fever		
Rheumatic Diseases and the Cardiovascular System		
Tumors Affecting the Cardiovascular System	۲۸	۲۸
Psychiatric and Behavioral Aspects of Cardiovascular Disease		
Neurologic Disorders and Cardiovascular Disease		
Interface Between Renal Disease and Cardiovascular Illness		
Cardiovascular Manifestations of Autonomic Disorders		
FUNDAMENTALS OF CARDIOVASCULAR DISEASE	۲۹	۲۹
Global Burden of Cardiovascular Disease		
Heart Disease in Varied Populations		
Ethics in Cardiovascular Medicine		
Clinical Decision Making in Cardiology		
Measurement and Improvement of Quality of Care: Relevance to Cardiovascular Clinical Practice		
Critical Evaluation of Clinical Trials		
Personalized and Precision Cardiovascular Medicine		
MOLECULAR BIOLOGY AND GENETICS	۳۰	۳۰
Principles of Cardiovascular Molecular Biology and Genetics		
Drug Therapeutics and Personalized Medicine		
Biomarkers, Proteomics, Metabolomics, and Personalized Medicine
