

Designed for use with neonates and pediatrics, for the short-term stable delivery of oxygen.

## Reusable Oxygen Hoods

Manufactured from transparent acrylic, all Reusable Oxygen Hoods are provided in round visibility models.

The edges of these oxygen hoods are hand polished for smoothness and aid effective cleaning.

Adjustment neck apertures are standard and the smallest hood features a sloping front to accommodate the patient's chin.

The Oxygen Hood can be used with Incubator.

Use a nozzle without hazard noise.
