

## Persian GPE At a Glance

Persian GPE was founded with the scope of providing various solutions for tank equipment and firefighting systems requirements of oil, gas and petrochemical industries. Global in vision and rooted in regional values, GPE is driven by a performance and quality etc pegged on value creation for its clients. The company is anchored by an extraordinary workforce and professional employees in different levels. GPE is an important player in its all operational sectors and offers customers distinctive tailor made solutions by its products and services. The GPE state of art manufacturing facilities coupled with its extensive quality management system provide compliance of GPE products with exact customers' requirements and industry standards.

The Scope of GPE activities covers a wide range of products and services as process and safety tank equipment, water cooling & firefighting equipment, roof seal, roof drain and skimming systems. GPE typical products are:

- Roof Sealing Systems of Floating Roof Tanks including: Primary and Secondary Seals, Mechanical Seals, Foam Seals, Tube Seals ...
- Drainage Systems of Floating Roof Tanks including: Swivel Joints Types, Pivot Types, Flexible Hoses ...
- Floating Suction and Skimmer Systems
- Aluminum Internal Floating Roofs
- Marine Loading Arms
- Firefighting Foam Equipment including: Rim Seal Foam Pourers and Top Pourer Foam Makers, Foam High Back Pressure Systems, Foam Monitors, Jet/Fog Nozzles, Bladder Tanks, Foam Tanks, Foam Proportions ...
- Firefighting Water Cooling Equipment including Spray Nozzles, Hydrants, Water Monitors, Landing Gate Valves, ...
- Tank Venting Valves including: Pressure and Vacuum Breather Valves, Pressure Relieve Valve, Emergency Vents, Flame Arresters, Gauge Hatches , ...
- Control and Shut Off Valves: Deluge Valves, Plug Valves , ...
- Strainers: Basket Type, Y-Type ,....

Beside these, GPE provides distinctive tailor made solutions by its services including:

- Engineering Services: Tank and vessel design, drain & floating suction design, floating roof seal design, tank venting calculation, tall tower design, heat exchanger design, air cooler design, diffuser design, shell bucking analysis, fixed roof and dome design calculations, tank evaluations, vapor loss calculations, specification review & development, firefighting foam/water protection systems
- Installation Services (AIFRs, Seals, Domes, etc.): Fittings and appurtenances, floating roof drain Systems, primary and secondary seals for floating roof tanks, geodesic dome installations
- Fabrication Services: Spherical tank, pressure vessel, tall tower, heat exchanger, air cooler, platforms, staircases (spiral & radial), vertical cage ladders, rafters, quick draw sumps, roof sumps, carbon steel floating roofs & pontoon sections, retrofit stair treads for rolling ladders, wind girders, spools, rolling ladders, shop built tanks,
- New Tank Construction: Open top floating roof tanks, umbrella roof tanks, internal floating roof tanks, external floating roof tanks, double bottom tanks, support cone roof tanks, self-supporting cone roof tanks, dome roof tanks, Cone bottom / shovel bottom tanks
- Verticality & Roundness Studies

### **Mission and Vision**

To provide sterling quality, environment friendly and safety-conscious technical services for the Oil, Gas and Petrochemical industries; enable our customers with cost effective technical solutions using state of the art technology in global scale.

### **Purpose Leadership with trust**

At GPE our purpose is to continuously add value to companies we serve by effectively improve quality of our products and services. We do this through leadership in sectors of industrial technological significance, to which GPE brings a unique set of capabilities. This requires us to grow aggressively in focused segments of industry. Our heritage of quality assurance evokes trust among customers, employees, shareholders and the community. This heritage is being continuously enriched by the formalization of the high standards of behavior expected from employees and company.

The GPE name is a unique asset representing leadership with trust. Leveraging this asset to enhance company synergy and becoming locally and globally competitive is the rout to sustained growth and long term success.

### **Values**

GPE has always sought to be a value driven organization. These values continue to direct the company successful growth and business. The five core values underpinning the way we do business are:

**Integrity:** we must conduct our business fairly with honesty and transparency. Where required, everything we do must stand the test of our stakeholders' scrutiny.

**Excellence:** we must constantly strive to achieve the highest possible standard in our day to day activities and the quality of the products and services we provide.

**Unity:** We must work cohesively with our colleagues across the company and with our customers and partners to build strong relationships based on tolerance, Understanding and mutual co-operation.

**Responsibility:** We must continue to be responsible, sensitive to the countries, communities and environment we work in, always ensuring that what comes from people goes back to the people many times over.

**Understanding:** We must caring, show respect, compassion and humanity for our colleagues and customers and always for the benefits of the industry we serve.

### **Brand**

Our brand communication objective is to be perceived as the region most competitive supplier and manufacturer of tank equipment and firefighting services and the best choice in oil and gas industry.

Our brand is an expression of our strength, our values and our aspirations. Our brand reflects a conscious attempt to integrate and express our comprehensive range of products, extensive resources, vast history of success, cohesive organizational structure and unity.

The desired result is to be portrayed within the industry as the first choice and a challenge seeking, achievement driven company.
